

Improving lives together

Low Secure Mental Health Service for Men

Greenacre Ward,
Cygnet Hospital Woking, Surrey

Good

Accepting
Referrals

Greenacre Ward is a low secure service for men with mental health needs. We can support individuals that may present a risk to themselves or others, including those that have been involved with the criminal justice system.

Our teams focus on recovery and rehabilitation, helping individuals progress safely through their pathway and avoid unnecessary delays in discharge. Minimising length of stay is a key focus and our secure wards benefit from being part of our integrated pathways of care, which aim to smooth transitions and shorten lengths of stay. These pathways include our neighbouring male mental health rehabilitation service at Cygnet Lodge Woking.

Male

18+ years

18 beds

Our service user profile:

- > Men, aged 18+ years
- > Detained under the Mental Health Act, including those under Ministry of Justice restrictions
- > Requiring assessment and treatment in a secure environment
- > Presenting active or potential risk to others
- > Have a diagnosis of:
 - Severe and enduring mental health problems
 - Psychotic disorder
 - Schizoaffective disorder
 - Schizophrenia
 - Personality disorder
- > May be exhibiting behaviours that challenge
- > May have dual diagnosis with substance misuse

Prison Transfer Programme

- > We also offer a specialised three month prison transfer programme, for assessment of prisoners whose mental health needs cannot be met in the prison environment
- > **Referrals and assessment:** We provide a rapid response to referrals, assessment within the prison environment, quick decision on suitability for transfer within five working days and liaison with MOJ over transfer warrants
- > **Comprehensive inpatient assessment:** Twelve week assessment programme including full diagnostic and risk formulations, IQ and neurological assessments, treatment plan and prison pathways if necessary

Our Psychology Department undertakes specialist psychological assessments, including personality, risk and neuropsychological assessments. They also provide individual, group and family interventions. A range of evidence-based therapeutic approaches are offered, including:

- > Cognitive Behavioural Therapy (CBT)
- > Dialectical Behaviour Therapy (DBT)
- > Eye Movement Desensitization and Reprocessing (EMDR)
- > Acceptance and commitment
- > Motivational interviewing
- > Solution focused approaches and family work
