

Improving lives together

Medium Secure Mental Health Service for Men

Peplau Ward, Cygnet Hospital Stevenage, Hertfordshire

Good

Accepting Referrals

Peplau Ward supports men in a medium secure environment where individuals receive specialist care, assessment and treatment.

Peplau Ward can support individuals who may experience behaviours of distress, including self-harm or aggression. This can include men who might be considered a risk to others or who have been involved in the criminal justice system. Many service users in our medium secure services have experienced difficulties with substance misuse, legal highs and alcohol.

The aim of our secure services is to help individuals learn how to manage their mental health and reinforce their daily living skills, to prepare them for life in a community setting, or in the least restrictive environment possible.

All wards at Cygnet Hospital Stevenage work closely together to provide a seamless secure care pathway for men and women. Working closely with NHS case managers and commissioners, we are able to provide solutions for service users requiring step-down service options both on-site at Cygnet Hospital Stevenage and across our national network of rehabilitation and specialist services.

Male

18+ years

14 beds
