

Improving lives together

Specialist High Dependency Complex Care Service for Men with Learning Disabilities

Cygnnet Cedars, Birmingham

Outstanding ★

Now accepting referrals

Cygnnet Cedars is a high dependency complex care service for men with learning disabilities, associated complex needs and who may have behaviours that challenge. We accept urgent referrals and the team are experienced in managing them quickly and efficiently to ensure the transition for each individual is as smooth as possible.

Within the hospital are two step-down single occupancy flats. With their own lounge, kitchen, en-suite bedroom and their own front door this allows for further community integration and focus on daily living skills.

Each individual in our care begins a personalised care pathway that helps them develop necessary skills to leave our service and move towards a less restrictive setting.

Male

18+ years

24 beds (22 + 2 step-down flats)

Our service user profile:

- > Primary diagnosis of learning disability and mental health complex needs
- > May present with co-morbid presentations:

 - Personality disorder, schizophrenia, depression, bi-polar disorder
 - Dual diagnosis
 - Complex needs and / or multiple diagnoses
- > May be detained under the Mental Health Act
- > May have a history of repeated hospital admissions
- > May have a forensic history

The service at a glance

Cygnnet Cedars is centrally located in Bordesley Green, just 3 miles away from Birmingham City Centre. With great transport links on the doorstep, the individuals have an extensive array of local amenities including leisure centre, gyms, shopping centres, workplace settings and colleges.

We encourage the men in our care to make their own choices and live as independently as they are able to. Our in-house multi-disciplinary team (MDT) supports each individual to achieve their own goals. This offers support from the nursing team, psychology, psychiatry, speech and language and occupational therapy.

Our psychology approach aims to address clinical and forensic risk by drawing upon a variety of therapeutic models and positive behaviour support in order to assist individuals in working towards an empowered and positive future.

Our speech and language therapy approaches include a total communication environment, 1:1 and group sessions looking at a variety of communication skills and needs alongside social skills. A range of individualised accessible information is provided where required to facilitate learning and aid understanding.

The occupational therapy team promotes setting realistic goals. By using a person-centred and holistic approach, the team enable the individual to achieve things that are meaningful to them.

The therapy programme at Cygnnet Cedars offers activities balancing self-care, productivity and leisure. These activities and functional tasks support positive mental health. The team support service users to identify routine, roles, interests and occupational demands.

"Over time his condition gradually improved, and while he is not, and probably never will be, the person that I have known all my life, he is far more settled and relaxed than in the first few months. This is down to the care and treatment he received from everyone at Cedars: the Doctors, Nurses, Carers, Occupational Therapists, Chefs and Administrators have all played their part and made a real difference.
Please pass on our thanks to the whole team for doing such a great job under such testing circumstances."

Family member

"I feel that the staff are amazing. I like that I can have a job that I can get paid for it. Staff always find time to listen to me and understand my feelings, they cannot always change my problems but they give me 100% support and I appreciate."

Service user
