now taking
referrals

Adarna Ward is our 15 bed rehabilitation service at Cygnnet Hospital Wyke, for men with mental illness and a secondary diagnosis of autism spectrum disorder (ASD), we also take individuals who haven't been formally diagnosed with ASD, but who have a high clinical suspicion.

The focus of the service is on recovery through meaningful engagement both within the service and in the local community. Our aim is to support individuals to live with their condition and to discharge them onto the least restrictive setting suitable for them.

Male

18+ years

15 beds

Our service at a glance

The multi-disciplinary team (MDT) work together with the people we support to provide holistic person-centred assessments and care plans. The **psychology** team, using models of dialectical behaviour therapy (DBT) and adapted cognitive behavioural therapy (CBT), work in groups or individual sessions depending on the need of the individual. They will work with them to understand their goals for treatment. The team support individuals to build their confidence in understanding, managing and regulating their emotions and then helping them to develop coping skills that will aid their rehabilitation. The **occupational therapy** team provides sensory integration therapy, sensory assessments and has established links in with the local community, including various autism friendly community groups. Our **speech and language** therapy support individuals to understand their communication needs and making adaptations where necessary.

We ensure that we provide high quality care to our the people we support as well as their families and carers. With the right support, our individuals are able to live a more fulfilling life.

The ward is set in a spacious environment with a large open communal lounge area, an enclosed courtyard and multiple communal areas including a sensory room, IT suite, and therapy kitchen. There is also a de-stimulation suite to provide a low stimulus environment for individuals who may be experiencing heightened feelings of agitation.

Activities of daily living skills kitchen to support individual cooking sessions and skill development

Focus on **reducing restrictive practice**

“Very happy with the progress the individuals have made. Sending them to Adarna Ward was the best decision for them.”
