

Low Secure Mental Health Service for Men

Greenacre Ward,
Cygnet Hospital Woking, Surrey

Accepting Referrals

Greenacre Ward is our male low secure service. Men on Greenacre may experience behaviours that are challenging, including self-harm or aggression and may be considered a risk to others or have been involved in the criminal justice system.

Our teams across our secure services support a focus on recovery, reducing the time individuals have to spend on the ward. Minimising length of stay is a key focus and our secure wards benefit from being part of our integrated pathways of care, which aim to smooth transitions and shorten lengths of stay. These pathways include our neighbouring male mental health rehabilitation service, Cygnet Lodge Woking.

Male

18+ years

18 beds

Our service user profile:

- > Men, aged 18+ years
- > Detained under the Mental Health Act, including those under Ministry of Justice restrictions
- > Requiring assessment and treatment in a secure environment
- > Presenting active or potential risk to others
- > Have a diagnosis of:

Prison Transfer Programme

- > We also offer a specialised three month prison transfer programme, for assessment of prisoners whose mental health needs cannot be met in the prison environment
- > **Referrals and assessment:** We provide a rapid response to referrals, assessment within the prison environment, quick decision on suitability for transfer within five working days and liaison with MOJ over transfer warrants
- > **Comprehensive inpatient assessment:** Twelve week assessment programme including full diagnostic and risk formulations, IQ and neurological assessments, treatment plan and prison pathways if necessary

Treatment

Greenacre Ward provides three core treatment phases:

- > Assessment in safe and supportive environment
- > Treatment and engagement
- > Recovery and rehabilitation

The final pre-discharge stage focuses on recovery and rehabilitation work and includes daily living skills, offence related work and further psychological interventions. In this phase service users make significant use of community placements and services.

We use a model of treatment based on the principles of the recovery model of care including psychological therapies, occupational therapy, social therapy, physical healthcare and medication. Risk assessment tools are used and a clinical formulation is developed to inform the management plans for each patient.

Our Psychology Department undertakes specialist psychological assessments, including personality, risk and neuropsychological assessments. They also provide individual, group and family interventions. A range of evidencebased therapeutic approaches are offered, including:

- > Cognitive Behavioural Therapy (CBT)
- > Dialectical Behaviour Therapy (DBT),
- > Eye Movement Desensitization and Reprocessing (EMDR)
- > Acceptance and commitment,
- > Motivational interviewing,
- > Solution focused approaches and family work.

Multidisciplinary team (MDT) consisting of:

- > Clinical Psychologist
- > Assistant Psychologist
- > Consultant Psychiatrist
- > Occupational Therapist
- > Practice Nurse
- > Ward Manager
- > Specialty Doctor
- > Mental Health Nurse
- > Support Workers
- > Social Worker

Service users can take part in a range of activities including:

- > Swimming sessions
- > Walking groups
- > Cycling groups
