

Enhanced Community Residential Service for Men with Neuropsychiatric or Neurodegenerative Conditions and Complex Needs

Meadows Mews, West Midlands

Now accepting referrals

Meadows Mews is an enhanced community residential service for men with neuropsychiatric or neurodegenerative conditions in Tipton, who may have behaviours that challenge alongside additional social and complex needs.

Meadows Mews acts as a transitional service from inpatient rehabilitation for those individuals who have been able to progress through the hospital pathway but now require the ability to return to the community; where participation in both social and domestic activities is vital for their quality of life and long term future in the community.

It is vital therefore, that a robust and effective community reintegration programme is provided for those coming out of a hospital setting to ensure that they can achieve their most independent and positive lifestyle, taking full advantage of all their hard work to achieve a level of recovery that can allow them to explore living in the community.

It's a daunting thought for service users to go from a hospital setting to living in the community with minimal restrictions. This is why residents at Meadows Mews will continue to receive psychiatric, psychological, occupational therapy and support worker interventions and support, as required.

Male

18+ years

10 beds in 5 self-contained apartments

The aim of this treatment is to complete brain injury rehabilitation in the community setting with emphasis on making the necessary specialist help available outside the hospital setting.

Meadows Mews comprises of ten bedrooms split across five self-contained apartments in a row, to create a sense of community for our residents. All these homes feature a rear garden with patio area, driveway for visitors, living/dining room, bathroom plus additional WC and fitted kitchens offering appliances.

Our approach:

We place individuals at the heart of everything in a partnership arrangement wherever possible.

We ensure day-to-day practice is embedded in an overarching framework of support whereby the whole team around the person consciously takes into account the interaction, communication and flexibility of each individual we support.
