Welcome

Cygnnet was established in 1988. Since then we have developed a wide range of health care services for young people and adults with mental health needs, acquired brain injuries, eating disorders, autism and learning disabilities within the UK. We have built a reputation for delivering pioneering services and outstanding outcomes for the individuals in our care.

Our expert and highly dedicated health care team of 7740 employees empower 2000 individuals across 83 services to consistently make a positive difference to their lives.

Cygnnet Health Care is part of the Cygnnet Group which also provides social care services for adults in England, Scotland and Wales.

Introduction

Cygnnet Health Care provides highly specialised services for men and women who are hard of hearing and who have complex mental health needs including mental illness, personality disorder, autism spectrum disorder or learning disability.

As a national provider of Mental Health and Deafness services, we offer culturally sensitive treatment for Deaf service users with mental disorders. Staff are highly skilled in British Sign Language (BSL) and the services are well known for innovation and development within the field.

Our specialist Deaf services provide expertise and resources to enable service users with complex communication needs who may have a mental illness, learning disability or personality disorder to participate safely and as fully as possible in their care and achieve outcomes to support their discharge from hospital.

At Cygnnet Hospital Bury we provide specialist low secure Deaf services for men and medium and low secure services for women.

We use a recovery model and support each service user to achieve realistic goals by accessing meaningful assessment and treatment.

Our service user profile:

- > Complex communication needs which may relate to deafness alongside mental illness, personality disorder, learning disability or developmental disorders such as autism spectrum disorder
- > Requiring assessment and/or treatment in a medium or low secure setting
- > May require inpatient care as a result of significant risk of aggression, absconding associated with serious risk or serious risk of self-harm, suicide or vulnerability
- > May or may not have a forensic history

Phase One

Understanding me Pre-Admission & Admission

Getting to know my team and support group

Phase Two

My Skills Assessment

Understanding my needs and support required for a safe future

Phase Three

My Independence Treatment

Building trust, actively engaging in treatment and re-learning new skills

Phase Four

Preparing to move on Transition & Discharge

Consolidating skills and moving on to a safe, purposeful and meaningful future

Thank you to all services users and staff who contributed to our Model of Care

Pre-admission

Early multi-disciplinary team assessment, risk formulation and determination.

Assessment phase

Comprehensive assessment using CANFOR, HCR20, RSVP, SAPROF, Sunburst Communication Assessment, Start, MOHOST, neurological and language assessment, introduction of recovery tools and production of length of stay.

Active treatment phase

Adapted psychological therapies to meet individual communication needs utilised including Life Minus Violence, sex offender treatment programmes and dialectical behavioural therapies. Service users are empowered to understand their diagnoses and address mental disorder issues.

Recovery, rehabilitation and pre-discharge phase

Focus on preparation for life in the community or next phase of care. Intensive occupational and social therapy, close liaison with community mental health teams and NHS gatekeepers to support the next phase or discharge.

Our myPath care model

myPath is our unique overarching care model which serves to monitor service user engagement levels, manage their records, assess individual progress and formulate a personalised and dynamic care plan with measurable targets. Within our Deaf Services, **myPath** promotes collaborative care and treatment pathways from admission to discharge with a focus on setting realistic goals through access to meaningful assessment and treatment.

For each individual, a daily risk assessment is completed, which enables dynamic responses to individual presentation within any 24 hour period and encourages positive risk-taking through robust management plans that focus on reducing restrictive practice, personalised risk assessment and self-directed coping strategies where possible. Each individual is offered a minimum of 25 hours meaningful activity in the categories of self-care, leisure and productivity, which is evidenced and documented within an individualised activity timetable based on recovery and personalised preferences. All individual care pathways are guided by a dynamic care plan which is closely linked to our specialist outcome tool, the Global Assessment of Progress (GAP). In our Deaf Services, the GAP allows us to measure an individual's progress during their admission, plot the positive developments, setbacks and changes in well-being and when utilised within care planning allows us to evidence quality and innovation.

myPath delivers industry-leading results and for Deaf Services, myPath compliments the 'All About Me' (AAM) model which is a nationally recognised recovery package to support Deaf service users who may experience mental illness.

Cygnet Hospital Bury, North West

Buller Street, off Bolton Road, Bury, North West BL8 2BS

Medium Secure Deafness & Mental Health

Low Secure Deafness & Mental Health

18+ years

Mixed Gender

35 beds in 3 wards

Cygnet Hospital Bury provides highly specialised Mental Health and Deafness services in medium and low secure settings. We offer individualised assessment, care and treatment of a wide range of mental disorders, alongside complex communication needs.

The hospital team includes both Deaf and hearing professionals who provide expertise and resources to enable service users with complex communication needs who may have a mental illness, learning disability or personality disorder to participate safely and as fully as possible in their care and achieve outcomes to support their discharge from hospital.

Bridge Hampton is our specialist low secure Deafness and mental health service for Deaf men.

Upper West is our female medium secure service, while **Lower West** is our female low secure service.

All three wards support hearing and Deaf service users.

Our community links:

- > Bury and Rochdale colleges
- > Bleakholt dog sanctuary – dog walking work placements
- > Local Deaf clubs in Bury, Bolton and Manchester
- > Canal and River Trust
- > Leisure facilities including swimming and gym

Our facilities:

- > State of the art Recovery College including media suite
- > Sensory equipment
- > Occupational therapy kitchen
- > Therapy garden
- > Gym
- > Woodland walkways down to Elton Reservoir

All of our Mental Health and Deafness services use a recovery model and support each individual to achieve realistic goals by:

- > Establishing and understanding their communication style, how it has developed and the factors that are likely to impact upon communication and behaviour
- > Determining what potential a person has to improve communication and identify strategies
- > Developing highly individualised and accessible packages of care, in line with the All About Me Deaf Recovery Package
- > Supporting differential diagnosis

We offer a specialist interpreter service to facilitate communication between service users who are Deaf, and other hearing members of their extended care team. We are a major employer of Deaf staff which is vital to providing accessible and quality services. Our highly experienced and skilled interpreting team alongside a Deaf communication and translation specialist, support high quality care.

Our service has received national recognition for its pioneering work in making recovery and outcome focused work meaningful and accessible. All staff receive Deaf Awareness Training and are supported to access British Sign Language (BSL) classes. The communication policy provides the structure for meeting a service user's identified needs through their care pathway journey from within our multi-disciplinary team's diverse skill mix. All therapeutic programmes are adapted and delivered to make them meaningful and accessible based on individual language need. Service users have won national awards for service user involvement projects and co-produced the award-winning All About Me Deaf recovery package.

British Sign Language (BSL) is the primary language for service users in their care and treatment packages. In addition we also provide personalised visual adaptations

The Sunburst Communication Assessment

At Cygnet Hospital Bury we deliver Sunburst Communication Assessments across all of our adult Deafness and Mental Health services. Designed by Lindsey Gagan and Kim Williams, Speech and Language Therapists with extensive experience in Deafness and Mental Health, the Sunburst is intended to focus structured, functional assessment across nine domains of communication skill and supports individuals and their multi-disciplinary teams to explore strengths and areas of support needed. This informs the 'Communication' domain of the All About Me recovery package. The Sunburst Communication Assessment was initially piloted and later fully implemented at Cygnet Hospital Bury as part of successive national CQUIN schemes providing vital contribution to national development of this important area of Deaf service improvement.

92%

of service users feel they are treated as an individual when it comes to rules and restrictions

90%

of service user feel the treatment they are receiving is helping them progress towards discharge

96%

of individuals are involved as much as they want to be in decisions about their care and treatment

90%

of individuals feel the ward staff are **caring and supportive**

*Results taken from 2022 service user surveys.

All About Me

All About Me is an award winning mental health recovery package specifically developed by Deaf service users, for use in Deaf mental health services.

The package was developed as part of a national project that included service users and clinicians from Cygnet Health Care as well as from a number of NHS mental health trusts across England and other independent providers.

All About Me is designed to help service users meet their recovery goals in an individualised way, in a format that is meaningful to them. The recovery tools are provided in British Sign Language (BSL) format rather than English, and the package includes a BSL film and work book along with user friendly form templates.

An understanding of Deaf culture and recovery in mental health services underpin the All About Me package, along with NHS England's accessible information standards.

Understanding My
Mental Health

Healthy Living

Problems

Activities

Rights

Relationships

An individual's goals and outcomes are agreed for each of the domains, and these are then rated by individuals in a format that is chosen or created by them; this can be any format including visual, numerical or narrative.

In 2016, service users from Cygnet Hospital Bury took the package to the National Service User Awards where it won an Outstanding Achievement Award for service user involvement.
