Tier 4 Personality Disorder Service for Women

**New Dawn Ward,
Cygnnet Hospital Beckton, London**

New Dawn Ward at Cygnnet Hospital Beckton is an 18 bed specialist Tier 4 Personality Disorder service. Women can be admitted to New Dawn if they have a diagnosis of personality disorder, exhibit self-harming behaviour and are able to accept the need for help. Service users can be informal or detained under the Mental Health Act.

The service is structured so that there are two distinct areas in the ward aligned with the care pathway; pre-engagement and engagement. Following admission, a 12 week assessment period is undertaken to establish needs and determine the appropriate treatment pathway. Upon completion of the 12 weeks' assessment, a clear pathway will be formulated with the service user and discussed in their first CPA (Care Programme Approach) meeting.

New Dawn Ward structure is underpinned by the principles of the Enabling Environment which offers structured opportunities to give service users the meaningful interventions to address and deal with their problems in a safe environment. All treatment and interventions are geared towards preparing an individual for a positive discharge. The discharge planning process ensures that the service user is able to access ongoing support and advice from the local Community Mental Health Team as required.

Female

18+ years

18 beds

Our service user profile:

- > Women, aged 18+ years
- > Detained under the Mental Health Act, or may be informal
- > Primary diagnoses of personality disorder, schizophrenia, schizoaffective disorder, bipolar affective disorder and depression
- > May present with co-morbid presentations including:
 - Self-harm
 - Self-neglect
 - History of substance use
 - Complex needs
 - Treatment resistance
- > May have a history of trauma and/or abuse

Therapy programme

Dialectical Behaviour Therapy (DBT) is the main programme of therapy used on New Dawn Ward. The care pathway in line with our personality disorder model of care, is structured in phases which include a comprehensive clinical, psychometric assessment and formulation within 4-6 weeks of admission. In order to measure psychological outcomes, a symptom checklist - Revised (SCL-r) is completed for all service users on admission and then every three months to monitor changes in symptoms and associated distress.

DBT Informed pathway

Features two cycles of skills training, weekly 1:1 therapy, ad hoc skills coaching and 1:1 crisis management therapy. Service users who are motivated and show commitment to DBT will undertake the full programme.

Adapted DBT pathway

We recognise that standard DBT is not suitable for everyone, so we also provide an adapted programme, based within the DBT framework but tailored to the needs of individuals particularly where the service user may have an area of cognitive difficulty that impacts their ability to engage and process.

There are various options available on how this is delivered for people experiencing attention, concentration or motivational difficulties including conversational, experiential learning and visual aid approaches. This is then supported with further individualised practice on a 1:1 basis.

Our DBT programme has its own set of specific outcome measures, completed on admission to the programme, at 6 months and at 12 months:

- > State – Trait Anger Expression Inventory 2 (STAXI)
- > Five Factor Mindfulness Scale
- > Rotter's Locus of Control Scale
- > Rosenberg Self Esteem Scale
- > Difficulties in Emotion Regulation Scale (DERS)

Alternative therapeutic interventions

We also provide alternative NICE Guideline recommended therapies, including Cognitive Behavioural Therapy (CBT).

New Dawn Ward has a **mindfulness practice group** that runs weekly to help embed mindfulness in to the daily lives of service users

Specialist groups including **body image and healthy relationships** (run for a set number of weeks)

Service users suggest ward activities through a fortnightly community meeting

Occupational therapy is provided on an individualised and group basis, including self-nurturing, cooking, creative and walking groups

Service user survey results

Each service user at Cygnet Hospital Beckton is given the opportunity to complete an individual satisfaction survey.

82%

of service users have always felt safe during there time in hospital

97%

of service users think the ward staff are caring and supportive

89%

of service users are aware of how to make a complaint if they have one

87%

of service users have confidence and trust in the nursing staff

100%

of service users are aware of the Advocacy Service

“This is just a few words to try to explain how grateful we both are. When she first arrived she thought it was a waste of time being there as she said nobody would be able to help her.

Well thanks to all your expertise, you have helped her to become the old person from years ago. She is so confident and outgoing now it is great for us to see.
