Cygnet Social Care acquires The Daley Care Centre in Sheffield

Cygnet Social Care has announced the acquisition of The Daley Care Centre, a specialist Neurological Complex Care service located in Deepcar, Sheffield.

The Daley Care Centre has been delivering high-quality services for over 20 years, supporting individuals with high nursing needs, complex care, ventilation and tracheostomy requirements, and neurological conditions such as acquired or traumatic brain injuries, strokes, and motor neurone disease.

The expansion follows a period of significant growth for the organisation in 2025, including the acquisition of Oakview Care Services, Woodrowe Healthcare and Stepping Stones Residential Unit.

Gareth Williams, CEO of Cygnet Social Care, said: "The Daley Care Centre has built a strong reputation for delivering compassionate, person-centred neurological care in a truly supportive environment.

"Its' focus on multidisciplinary working and tailored care planning mirrors our own values and approach.

"Acquiring The Daley Care Centre is an exciting step for Cygnet Social Care and aligns closely with our commitment to expanding high-quality, specialist services across the country."

Cygnet Social Care will work closely with the existing staff team at The Daley Care Centre to ensure a smooth transition, with continuity of care for individuals remaining the highest priority.

Care will continue to be delivered by a highly skilled multidisciplinary team, including Registered Nurses, Support Workers and in-house therapists.
