Neurological Rehabilitation and Complex Care Service

**The Daley Care Centre,
Sheffield**

Good

The Daley Care Centre is a specialist Neurological Rehabilitation and Complex Care service supporting adults with acquired brain injuries (ABI), spinal cord injuries (SCI) and complex neurological conditions.

Through personalised rehabilitation, specialist nursing and longer-term care pathways, we help maximise independence, improve quality of life and achieve meaningful personal goals.

We provide dedicated care pathways designed to meet a broad range of individual needs:

- > Goal-focussed Neurorehabilitation
- > Specialist Complex Nursing Care (including spinal cord injuries and tracheostomies)
- > Longer Term Complex Care
- > **Coming Soon:** Advanced sensory testing and specialised support for individuals with prolonged disorders of consciousness (PDOC)

Why Choose The Daley Care Centre?

- > Specialist neurological rehabilitation and nursing expertise
- > Evidence-informed practice
- > Expert Interdisciplinary Team (IDT)
- > Fully equipped therapy gym
- > Independent Living Skills Kitchen
- > Person-centred complex care
- > Personalised rehabilitation plans
- > Access to specialist psychology and medical expertise
- > Part of Cygnet's established neuro services network
- > Flexible onward care pathways across the wider network

Our Pathways

Goal-focussed Neurorehabilitation

This pathway is most beneficial for people that require intensive rehabilitation to achieve clear, meaningful goals that increase independence or enhance quality of life. We offer assessment, rehabilitation and recommendations for onward care within an agreed timeframe.

Specialist Nursing Care (including spinal cord injuries and tracheostomies)

Supporting people with complex physical health needs, including spinal cord injuries, respiratory conditions, tracheostomies and PEG / PEJ feeding requirements.

Longer Term Complex Care

For individuals requiring ongoing specialist support due to progressive neurological conditions or long-term neurological impairment, where maintaining function and quality of life is the primary goal.

Coming Soon: Prolonged Disorders of Consciousness (PDOC) Assessment & Diagnosis Service

We will soon be offering a comprehensive assessment and diagnosis service for individuals experiencing prolonged disorders of consciousness (PDOC).

Our experienced clinical and rehabilitative teams will complete a full assessment, monitoring and diagnosis, formulating a clear set of recommendations for onward care and treatment.

The People we Support:

Adults aged 18+ affected by a neurological condition and / or injury

Diagnoses may include:

- > Acquired brain injury including those sustained through trauma, anoxia, stroke, tumour, virus, or infection.
- > Spinal cord injury
- > Established or suspected neurodegenerative conditions
- > Alcohol Related Brain Disease
- > Prolonged Disorders of Consciousness

Presenting symptoms may include:

- > Moderate to severe physical, cognitive, and / or communicative difficulties
- > Dysphagia with or without the requirement of PEG support / modified diets
- > Tracheostomy care
- > Mobility and posture impairments

Our Approach

Our Interdisciplinary Team (IDT) includes nurses, rehabilitation support workers, physiotherapists, therapy assistants, speech and language therapists and occupational therapists, working alongside highly experienced psychology and medical professionals.

The team is experienced in understanding and navigating the complex needs and comorbidities associated with brain injuries and neurological conditions. We often support individuals through use of assistive technology to help them achieve their personal rehabilitation goals, maximise independence and / or improve quality of life.

We pride ourselves on seeing everyone's unique potential and working collaboratively with them to help them achieve it.

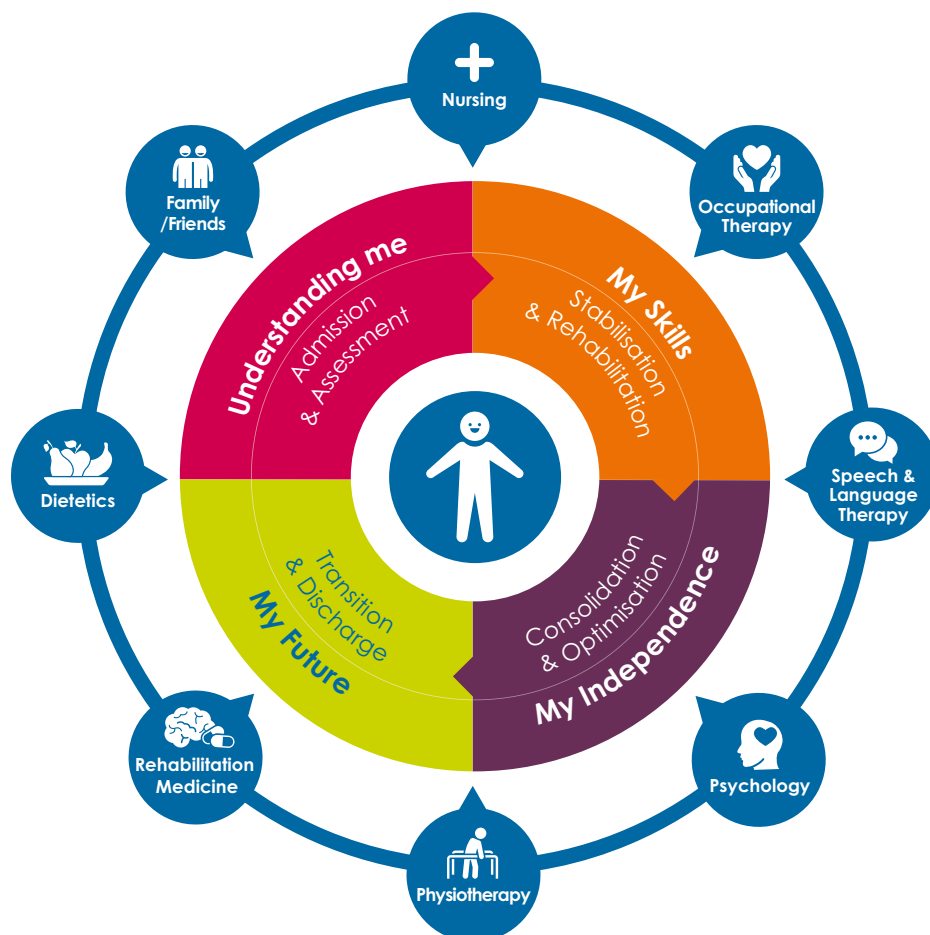

Our care plans and treatment pathways are highly personalised, building on each individual's strengths, interests, and goals while addressing their challenges. We also prioritise open, honest communication - managing expectations and providing a realistic outlook for both the people we support and their families.

As part of Cygnet's extensive Neurological service network, The Daley Care Centre provides access to a wide range of clinical experts and dedicated services, ensuring seamless access to alternative or enhanced care pathways when needed.

We track real progress using industry-standard outcome tools such as FIM-FAM. Ensuring clear data on functional gains and quality-of-life improvements for commissioners and families by utilising Goal Attainment Scaling. Ensuring each resident has their own personalised outcome measure.

Our Model of Care

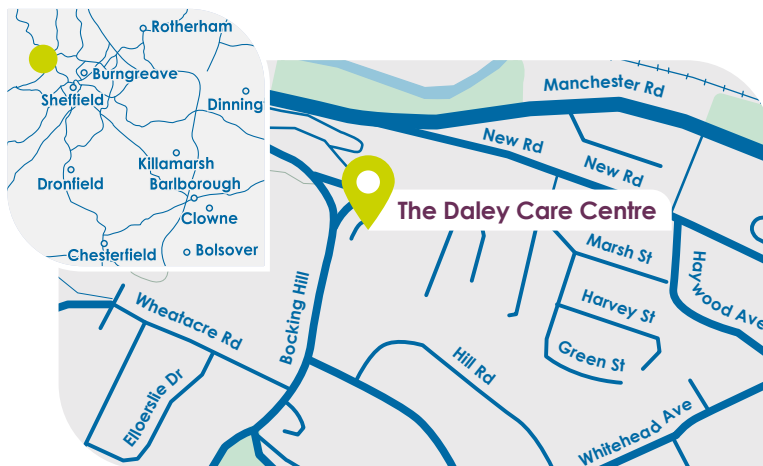

Service Map

The Daley Care Centre

2A Haywood Lane, Deepcar,
Sheffield S36 2QE

Phone number:
0114 283 7200

The Daley Care Centre is located in the tranquil countryside setting of Deepcar, just 10 minutes outside of Sheffield city centre. The home features 24 spacious ground-floor bedrooms, providing a highly accessible environment for people with mobility impairments and complex physical health needs. The centre has been recently refurbished and offers excellent on-site facilities, including a fully equipped therapy gym, an Independent Living Skills Kitchen to promote functional independence, and dedicated therapy spaces that support rehabilitation, recovery and quality of life.
